Recent Installations

Guttenplan's has been building a reputation for excellence in products and service since 1908 when founder Jacob Guttenplan opened his first bakery. Their state of the art, 80,000 sq. ft. manufacturing facility located in Middletown, New Jersey, is less than 20 miles from the site of the original Guttenplan's Bakery. Their products have stood the test of time and the service that accompanies them is always of the highest order.

The vision of Guttenplan's management and staff is to maintain their long tradition of excellence in products and service. It is a vision that includes constant technological improvement and growth, without sacrificing the dedication to exceptional customer service that has been characteristic of Guttenplan's since its beginning.

Gemini/KB Systems recently installed a new frozen dough moulded bread and pizza dough ball line for Guttenplan's frozen dough bakery in Middletown, NJ.

The line consists of a new Werner & Pfleiderer 6 pocket dough divider and rounder, with an intermediate rest proofer feeding twin "BM 3-40" bread molders which will produce up to 110 loaves per minute at a rate of approx. 7200 lbs. per hour. The bread molders are equipped with 6 sheeting rollers, each set of rollers are supplied

with easy access scraper assemblies and a unique warm air drying system that improves sheeting quality and dough molding
